BUCKBEE'S "FULL-OF-LIFE" BREEDER TULIPS *The Most Desirable Class of Tulips Ever Grown*

A picture can only give a faint idea of the beauty of these flowers and, although created from life, do not begin to show the wonderfully attractive colorings and shadings of these beautiful flowers.

On this page are pictured and described the five varieties which we can recommend as being absolutely the best you can secure and are well worth the small difference in cost over the varieties shown on the next page.

The figure after the variety name corresponds with the figure in the picture above.

SEE NEXT PAGE FOR THE POPULAR PRICED VARIETIES

OUR NEIGHBORS' GARDEN

To Our Friends:—

Let Congress adjourn and War Debt Settlements wait, and let us hope for desirable Farm Relief Legislation during the next session of Congress—but in the meantime let me enjoy my neighbors' garden—and they find much pleasure in mine. We know it is the American citizen's love of home that has made our nation as great and powerful as it is.

The average American home wants a garden they have planned and planted themselves, so they may express to the world their love of flowers and at the same time beautify their surroundings and making them justly proud.

You will get more real pleasure from a pretty flowering garden than a five-ring circus—you can have beautiful flowers from early spring until late fall. You can enjoy some of nature's wonders in your own yard or garden by planting Buckbee's "Full of Life" Bulbs, Seeds and Plants.

We are searching all over the world for new varieties of merit to supply our many friends. Our staff of experts are constantly at work experimenting to secure new and better varieties of flowers, shrubs and vegetables, and to perfect rare qualities for the garden of the Best Neighbor in the World—HIS MAJESTY THE AMERICAN CITIZEN.

Buckbee's "Full of Life" Breeder Tulips

The Most Beautifully Colored of Any Tulip

Breeder Tulips are very similar in habit to the Darwins and flower at the same time. Their chief characteristic is their immense blooms, borne on strong, stiff stems, many of them longer than the most gigantic Darwins.

The revival of the taste for art colors has made these Tulips, at one time very popular in England, strong favorites with American enthusiasts, who find in their bronze, buff and brown shades excellent material for contrasting with the light and bright colors of the Darwins.

No home is complete without its perennial border or garden, and no perennial bed can be complete without its Spring Flowering Bulbs. The Breeder and Darwin Tulips have an important part in making the garden complete, as their wonderful and unusual colors, coming at a time when nothing else is in bloom, adds a touch of beauty which cannot be replaced by any other flower.

Darwin Tulips are more largely grown every year and considering the splendid form and exquisite coloring, the immense size of the numerous varieties, it is not surprising that these flowers have obtained great popularity.

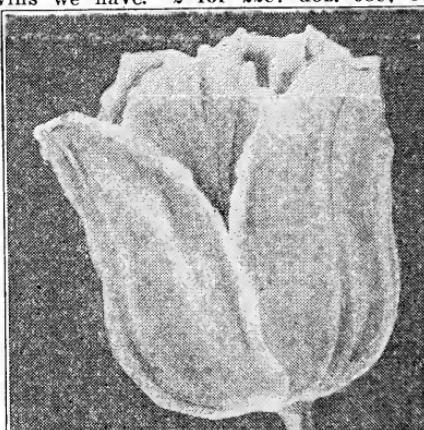

They are late May-flowering tulips but are quite distinct in style of growth from others of this class; they are very stately in appearance, attain a height of 2 to 3 feet and bear on long stems beautiful, globular flowers of lasting wax-like substance in a great variety of brilliant colors.

They are exceedingly effective when grown in groups of a dozen or more in the garden; as cut flowers they are unsurpassed and in pots these tulips are also lovely and can be successfully flowered in the house if grown in a cool room and not forced into bloom before March.

These wonderful flowers are so effective, when grown in separate colors, that we are listing the best varieties as well as the mixtures.

AMAZEMENT

The Most Wonderful Tulip Ever Grown

Darwin Tulips are without question the finest flower that can be had in bloom out of doors in the early Spring. Our collection has always been very complete, but our new Amazement is so far ahead of anything else that it is really in a class by itself.

Our Holland grower calls it a lilac color but that name fails to describe the beautiful coloring of this flower. The color seems to be a combination of rose, lilac, lavender and purple, all blended together, making a color never seen before.

Flower stems are 18 to 24 inches long, and blossoms are very large. 3 for 42c; doz. \$1.47; 50 for \$5.46; 100 for \$10.24.

DOUBLE EARLY

TULIPS

Double Tulips produce very large double flowers, many of which are as large and showy as a Peony. The bright colors of the large double blossoms contrast splendidly and make a charming display. The early sorts do splendidly when grown in pots for winter blooming, but must be forced much slower than Single Early Tulips by keeping them cooler.

PARROT OR DRAGON TULIPS

Parrot or Dragon Tulips

FOR THE OPEN GROUND ONLY

Absolutely Different in Shape and Coloring from Any Other Tulip

The most beautiful and interesting class of Tulips, which should be in every garden, as there is no other family of hardy garden flowers that offers an equal range. The Parrot Tulips make the best color display of the year. Coming in May, following the daffodils and early tulips, and just preceding the iris, they lend an interest to the garden which cannot be equaled. It is advisable to plant these tulips in groups in the border, with background, rather than in open beds. At least twelve should be used to make a group while fifty would be much better, and the rare colorings and shapes are wonderfully decorative. The flowers are very large and perfect in shape, the petals are corrugated and toothed, while color is the most striking combination of crimson and golden yellow, streaked and edged with green, resembling the plumage of a parrot, whence these tulips derive their name. A bed of these makes a gorgeous display, paying hundred-fold for any trouble that may be bestowed upon them.

Price, Select Bulbs, 6 for 33c; doz. 62c; 100 for \$4.24.

Buckbee's Beautiful May Flowering Tulips

One of the Best of the Garden Tulips.

These Tulips are quite distinct from the early flowering kinds—coming later, they extend the blooming season two or three weeks longer, and are usually at their best about Decoration Day. They are exceedingly hardy and therefore excellent for planting in the perennial border or among the shrubbery, where they remain undisturbed for years. The colors and markings of late Tulips are truly magnificent.

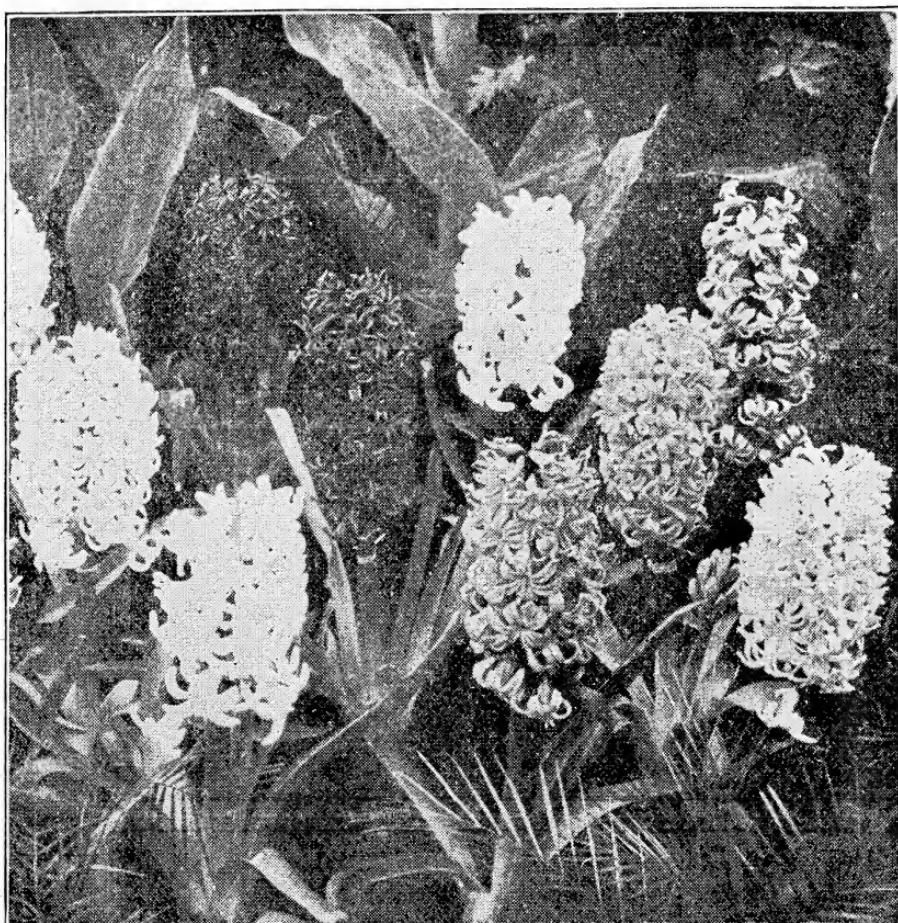

Buckbee's Superfine Mixed—Everyone should have at least a dozen of these beauties. All the best colors assorted. Price 6 for 32c; doz. 58c; 100 for \$3.97.

NOTICE—Send in your order for bulbs at once and we will ship as soon as stock arrives from Holland, usually early in September. 12 Bulbs or less sent postpaid. 100 or more by express collect.

HYACINTHS

For Winter and early Spring flowering, nothing surpasses the Hyacinth. Sure to bloom and give satisfaction in the house during Winter, or in the garden in early Spring. We consider the Single Hyacinths more useful and valuable than the double varieties. They are better for forcing, more vigorous in growth, and produce stronger spikes of bloom, which are at least as beautiful as those of the double sorts.

Our stock of Hyacinths consists of the finest bulbs, sure to bloom, and were grown by the most reliable growers in Holland, and have been selected with the utmost care as regards varieties that in our judgment will give the very best results for outdoor or house culture. Our assortment contains the cream of all the more desirable sorts, and we take this opportunity to assure intending purchasers that these bulbs cannot be obtained to better advantage elsewhere.

New Roosevelt Fern

FERNS—Rare and Beautiful

NEW ROOSEVELT FERN

The Greatest Fern of the Age

In general characteristics it resembles the Boston Fern, but it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other fern.

Fine young plants, each 24c, 34c and 44c, postpaid.

Larger plants, each 99c, \$1.99 and \$2.99; by express, not prepaid.

THE BOSTON FERN

Nephrolepis Bostoniensis

This is one of the old standbys, and still one of the best. Its long, graceful drooping fronds often attain a length of 6 or 8 feet in a single year.

Fine young plants, each 18c, 28c and 38c, postpaid.

Larger plants, each 97c, \$1.48 and \$1.94, by express, not prepaid.

THE OSTRICH PLUME FERN

Nephrolepis Piersonii

A strong, vigorous grower, resembling the Boston Fern somewhat, but the fronds are much heavier and more feathery, and arch over in a most graceful manner, showing two shades of green and producing a lovely mossy effect, which adds greatly to its beauty.

Fine young plants, each 29c, 38c and 47c, postpaid.

Larger plants, each 96c, \$1.97 and \$2.98, by express, not prepaid.

THE NEW CRESTED FERN

Whitmanii

We think this the most popular Fern. Rather dwarf in growth, but graceful, very compact, dense and feathery. Each frond or branch has a double row of perfect little fronds set at right angles to the mid rib, and so thick they seem almost crowded. It is a healthy, vigorous grower, constantly unfolding fresh fronds of light green that contrast exquisitely with the deep green of the older fronds. It is somewhat like Roosevelt, but decidedly more fluffy, more delicate and beautiful.

Fine young plants, each 23c, 33c and 43c, postpaid.

Larger plants, each \$1.01, \$2.01 and \$3.01, by express, not prepaid.

NEWPORT PARLOR FERN

Resembles the Boston in some respects, but grows more erect, has shorter, narrower fronds and makes three times as many of them. Thrives nicely in parlor or living room, requires very little attention.

Fine young plants, each 23c to 36c, postpaid.

Larger plants, each 98c, \$1.98 and \$2.97, by express, not prepaid.

BUCKBEE'S LACE FERN

The rare and delicate beauty of this plant can scarcely be shown by a picture or conveyed by a description. The bright green foliage of very delicate texture falls gracefully, giving it a style and air that cannot be surpassed. No more beautiful decorative plant has ever been produced. As a house plant it is deservedly popular, due to the fact that it will thrive under almost all conditions.

Fine young plants, each, 21c to 31c, postpaid.

Larger plants, each 99c to \$1.49, by express, not prepaid.

BUCKBEE'S FEATHER FERN

Grows freely the whole year round, producing sprays 4 to 5 feet long of fresh, green feathery foliage. Valuable for cutting for fine cut flower work, more particularly in use with large roses. Grown in suspended pots it makes a very pretty decorative house plant.

Fine young plants, each 19c to 29c, postpaid.

FLOWER SEEDS

FOR FALL PLANTING

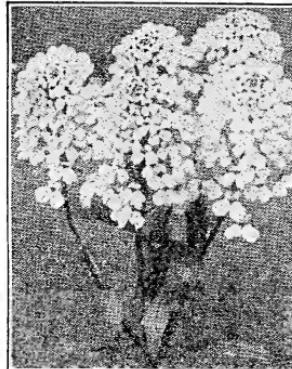

CONDENSED LIST OF STANDARD VARIETIES

By sowing hardy varieties of flowers during August and September a brilliant display of flowers can be secured at a small cost quite early in Spring at a time when usually the garden is comparatively bare, and these plants from Autumn sown seeds generally become larger and more robust and flower more profusely than if sown in Spring. Perennial flowers especially should be sown in Fall as most of them will not bloom the first year if sown in Spring, but if sown early enough, not later than October they can make good plants before frost, and will bloom freely the following year.

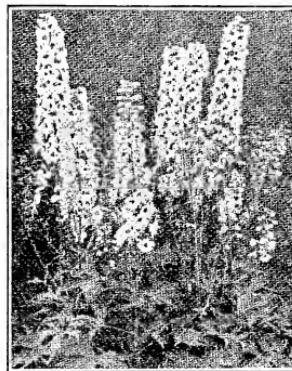

The varieties marked with a cross (x) are perennials.

(See general catalog for description of varieties.)

Vegetable Roots For Fall Planting

ASPARAGUS ROOTS

Every home and kitchen garden should have a bed of Asparagus. The growing popularity which this most delightful and wholesome vegetable has attained the past few years is remarkable. Without question, it is one of the most favorite and profitable garden crops; and makes a return early in the Spring before any other out-door crop can be marketed, and when a bed is thoroughly established will yield splendid crops for a number of years.

For success and immediate results we recommend planting the three and four year old roots.

Owing to the many and numerous requests of our customers for the largest sized roots we have especially grown a fair supply of selected 3 and 4 year old roots to meet this demand. Our price, as long as the supply lasts, on any of the varieties listed above, except New Washington Rust Proof, only 65c per doz.; \$3.50 per 100, postpaid. By express or freight at buyer's expense, \$2.50 per 100; \$18.50 per 1000.

HORSE RADISH

Horse Radish rarely produces seed, but is grown from pieces of the roots.

NEW BOHEMIAN OR MALINER KREN

Ordinary Horse Radish is a very profitable crop, but with this magnificent new sort from Bohemia the possibilities are wonderful. The roots are so much larger and heavier that the yield is about doubled. Then, too, it matures so much quicker that the crop can be sold in October. The flesh is pure white. Three and four tons per acre can be grown easily.

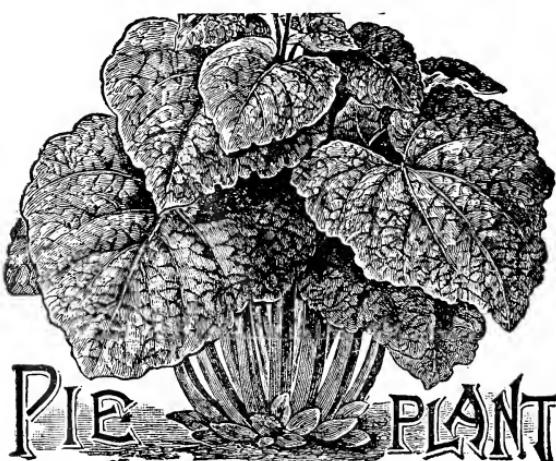

Fine Sets, postpaid, doz. 30c; 100 for \$1.95; by express or freight, not prepaid, 100 for \$1.75; 500 for \$7.50; 1,000 for \$14.00.

Buckbee's Famous "FULL OF LIFE" Lawn Grass SEED

Makes a Perfect Lawn. HARDY, LUXURIANT, ALWAYS GROWS

BUCKBEE'S WORLD'S FAIR LAWN GRASS SEED

THE VERY BEST LAWN SEED EVER OFFERED

This famous Prize-Winning Lawn Grass is made up of a most evenly balanced combination of native and foreign fine-leaved, deep-rooting grasses that interweave and flourish in different soils and climates, each showing its best strength at seasons different from the others, and thus keeping the lawn vigorous and green from Winter's end to Winter's next advent.

It is unrivaled for purity and luxuriance in growth and will give complete satisfaction wherever sown. With ordinary care, anyone can, by using this mixture, secure a beautiful lawn. Complete and explicit directions on "How to Make a Lawn" accompany every package of this seed. The quantity table on this page shows the amount of seed to plant in a given area. Price, postpaid, $\frac{1}{2}$ lb. 30c; 1 lb. 50c; 3 lbs. \$1.45. Larger quantities by express or freight, not prepaid, 5 lbs. \$2.25; 10 lbs. \$4.40; 15 lbs. \$6.45; 25 lbs. \$10.50.

SHADY PLACE LAWN GRASS SEED

THE VERY BEST OBTAINABLE—CAREFULLY BLENDED

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slake lime, at the rate of one bushel to each thousand square feet, or 40 bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed.

Price, postpaid, $\frac{1}{2}$ lb. 35c; 1 lb. 60c; 3 lbs. \$1.75. By express or freight, not prepaid, 5 lbs. \$2.75; 10 lbs. \$5.40; 15 lbs. \$7.95; 25 lbs. \$13.00.

VELVET GREEN LAWN GRASS SEED

A SPLENDID STANDARD MIXTURE

This special mixture does not include so great a number of expensive grasses as our "World's Fair Mixture," but full provision is made for a succession of growth and a careful blending in proper proportion and thoroughly mixed for quickly producing a permanent, thick and velvety sward of uniform growth and rich green grass free from coarseness. Prices, postpaid, $\frac{1}{2}$ lb. 25c; 1 lb. 45c; 3 lbs. \$1.30. By express or freight, not prepaid, 5 lbs. \$2.00; 10 lbs. \$3.95; 25 lbs. \$9.65.

WHITE CLOVER (For Lawns)

This is a valuable pasturage and lawn grass, thrives best on moist, rich ground; does not succeed well on thin soil. Makes excellent forage for Bees. In conjunction with Kentucky Blue Grass it forms a desirable permanent pasture for sheep and cows. Postpaid, 1 lb. 75c; 3 lbs. \$2.15.

KENTUCKY BLUE GRASS

EXTRA FANCY

Our "Full of Life" Seed is unsurpassed. Many prefer this to a mixture of grasses, and the fact cannot be denied that a lawn of Blue Grass is magnificent; it takes longer, however, to get it established. Very desirable for wood lawns, pastures, and especially excellent for winter pastures because of its thick, heavy growth. Price, postpaid, 1 lb. 45c; 3 lbs. \$1.30. By express or freight, not prepaid, 5 lbs. \$1.95; 10 lbs. \$3.85; 25 lbs. \$9.35.

Quantity of Lawn Grass Seed to Use

1 lb. for 350 square ft.	25 lbs. for one-fourth acre.
5 lbs. for 1750 square ft.	50 lbs. for one-half acre.
10 lbs. for 3500 square ft.	100 lbs. for one acre.
15 lbs. for 5250 square ft.

READ THESE FEW WORDS ABOUT RELIABLE SEEDS

From Good Seeds only can good crops be grown, yet a great many contingencies may arise to prevent the best seeds from giving satisfaction, and for all these reasons we cannot, of course, guarantee or be responsible for a crop, as success is dependent upon natural causes which are beyond human control. Therefore, we do not warrant in any way, express or implied, the contents, or the description, quality, productiveness, or any other matter of any Bulbs, Seeds or Plants sold by us, and we will not in any way be responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof, and he must return them at once, and the money will be refunded. Subject to above conditions we make this sale, at the moderate prices at which we sell our goods.

OUR BIG NEW CATALOGUE FOR 1927 will be issued about the first of the year; if you fail to receive your copy in proper season, kindly let us know.

RESURRECTION PLANT

Most Unique Novelty

A Marvel of Plant Life

This peculiar plant is found among the pines and cedars of Palestine. It is a ball of tightly folded leaflets, dry and apparently dead. But a transformation takes place once it is dropped into a bowl of water, for in a short time there is a great, loose, expanded rosette of fine fern-like leaves, both odd and beautiful. This can be repeated many times, the plant curling tightly together when dry, expanding when soaked. 15c each; 3 for 40c; postpaid.
